COMPANY PROFILE

SPECIALISED SUPPORT EQUIPMENT

◀◀ ABOUT US

OUR HISTORY

Founded in 1995, ETT is a specialist engineering company based in Richards Bay, South Africa with a leadership team committed to developing high quality, innovative specialised support equipment for mining, smelting and industrial applications.

OUR COMPANY TODAY

ETT has become the preferred supplier of engineered specialised vehicle solutions for industrial, mining and construction OEM distributors and dealers.

Our proficiency in the disciplines of innovation, design and world class manufacturing of specialised support equipment for mining and industry set us apart from our competitors. Our solutions are aimed at improving productivity and safety and are currently deployed in over 20 countries around the world.

In addition to our globally leading mining and industrial equipment, we also manufacture premier smelter equipment suitable for aluminium and steel applications as well as downstream production operations.

Customer satisfaction is paramount at ETT and we achieve this by listening to, and clearly understanding, our customers' needs before initiating the process of developing or engineering a solution that exceeds their expectations.

INNOVATION DRIVEN

Our highly skilled team of engineers, hydraulic specialists and automotive electronics experts are the foundation of ETT's success enabling delivery of products and solutions of exceptional quality.

We have extended our smelter solution manufacturing programme to include a range of German engineered smelter support vehicles and metal mill slag pot carriers. This partnership with Glama GmbH, a world leader in this highly advanced industry, qualifies ETT to supply this equipment to market.

QUALITY

ETT is an ISO 9001:2015 accredited company at the forefront of quality management technology. Our technologically advanced fingerprint-based quality control system ensures individual accountability throughout the manufacturing process, ensuring excellence at every turn.

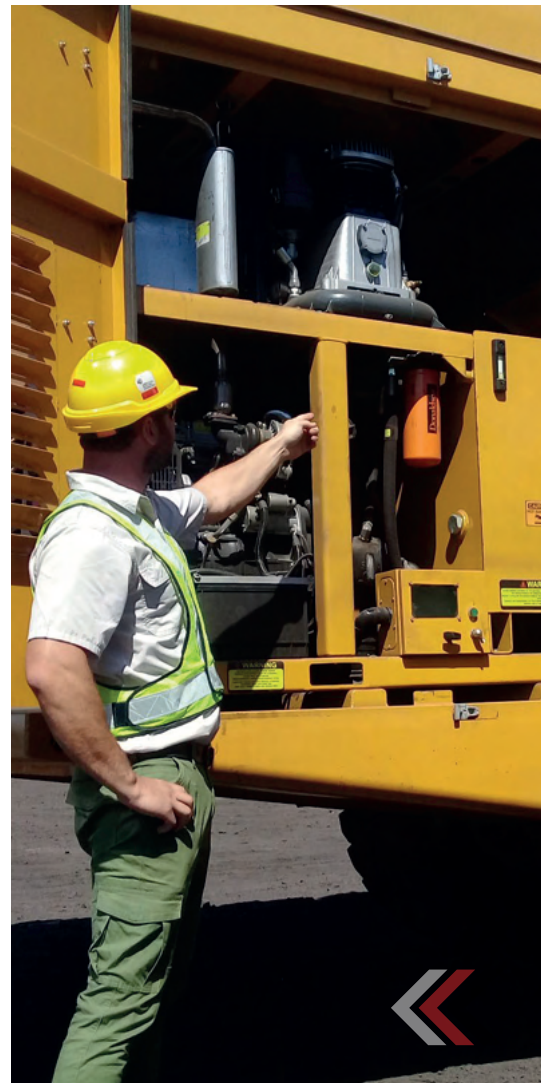

PRODUCT AND AFTER SALES SUPPORT

At ETT we rely on our Customer Relationship Management system, backed by professionally trained technicians who are managed through a monitored tracking system offering dynamic billing, to present a full range of after sales service and support solutions, parts and spares stationed globally.

We also offer advanced remanufacturing services, which not only extends the life of ETT equipment, but also provides the service of remodelling opposition equipment as well.

Remanufacturing services include:

- » Re-engineering of competitor Off-road Lowbed Trailers braking and hitch system
- » Re-engineering and retrofit kits for competitor Off-road Fuel and Lube Trucks and pumping systems
- » Off-road Tanker refurbishment and repair
- » On site retrofit of ETT Canbus Control Systems and Water Spray System to competitors water trucks.

◀◀ PRODUCT RANGE

MINING EQUIPMENT

- » Water Trucks
- » Fuel Trucks
- » Service Trucks
- » Lowbed Trailers
- » CDR Spray System
- » Water Cannons
- » Haul Road Sweepers
- » Recovery Gooseneck
- » Tyre Handlers
- » Remote Skidsteers

SMELTER EQUIPMENT

- » Low Profile Remote Skidsteer Loaders
- » Ladle Transport and Tilting Vehicles
- » Ladle Transport Vehicles
- » Bath Tapping Vehicles
- » Anode Pallet Transport Vehicles
- » Furnace Charging Vehicles
- » Slag Pot Carriers

◀◀ CONTACT US

Let us take care of your mining and industrial specialised mine support equipment requirements. We are a global business able to ship and support products around the world.
